

Figure 3 Supplement 1: A) Comparison of IncTAM34a expression in HEK293T cells (high endogenous IncTAM34a), and the wild-type (wt), mock, and IncTAM34a over-expressing stable cell lines. Effects of IncTAM34a over-expression on cyclin D1. CCND1 expression **(B)** and western blot quantification of protein levels **(C)** in IncTAM34a over-expressing PC3 stable cell lines. Experiments were performed in biological sextuplets **(B)** or triplicates **(C)**.
